

## East Perth Concrete community update

June 2017

Holcim (Australia) Pty Ltd

We are pleased to be able to communicate with you once again and provide an update on our operations and what we are doing in the local community.

### Update on application to continue operations in East Perth

#### Application to modify existing approval submitted

Since our last door knock around the community and newsletter, we have lodged an application with the City of Vincent to continue operating in East Perth. The key areas of change includes extending the approval past the current expiry date and voluntarily setting a specific truck route to and from our concrete plant to reduce the impact of truck movements on local streets. If you have any queries relating to this application, please do not hesitate to contact Holcim with the details provided on the bottom of this page.

### Community activities

#### Curtin University visited East Perth Concrete in May

In May, seventy eight engineering students from Curtin University undertook a guided tour of our East Perth Concrete Plant. During the day, students learned about quality management, truck compliance, safety and water management. This was a great opportunity for future leaders of the industry to be exposed to the day to day operations of a concrete plant.

#### Holcim joins East Perth Community Safety Group

Holcim recently joined the East Perth Community Safety Group (EPCSG). In June, General Manager, Rebecca Reeves attended their quarterly meeting to hear from a variety of speakers of matters important to the local residents and business.

The EPCSG exists to inform residents of crime and safety issues and promote community spirit. For more information of the EPCSG, please visit <http://www.eastperthsafety.net/>.

### Community feedback and how you can be involved

Community feedback is important to Holcim as it helps guide decision making for our operations. Please don't hesitate to contact us should you have any questions, concerns or feedback. Likewise, don't forget to let us know of any community projects or needs and we will strive to help out wherever possible.
