	• Next blast 25 September 2026 • Holcim will continue with the blast notification system by SMS ★ ACTION: Upload Dust Monitoring summary to Beenleigh Quarry community web page (K.H) ★ ACTION: Upload Blast Monitoring Summary handout to Beenleigh Quarry community web page (K.H)
Southern Lands update	Police Patrols update Holcim are continuing Police Patrols, working with Heidelberg to extend the period of the patrols, and liaising with Gold Coast City Laws Council to stagger patrols for more coverage. 5 patrols from 10 July - 11 September 28 June (Sunday) - Cancelled due to staffing shortage 10 July (Friday) - 16 Street checks 25 July (Saturday) - 18 Street checks 8 August (Saturday) - 11 Street checks 23 August (Sunday) - 28 Street checks 11 September (Friday) - 20 Street checks Traffic infringements & Warnings issued 0 x Warnings for trespass Evidence of trail bikes and four-wheel drives frequenting the area. Sue mentioned 4WDs and bikes have been accessing the area between the right of the Council gate on Cliff Barron Road and the tree at the end of a resident's driveway. This unauthorised access has led to the exposure of the tree's roots. Council have been notified about this issue in the past without a resolution, they have recently been notified again. Working with Heidelberg to conduct day/night patrols. 219 Patrols & 2787 Street checks done to date Next patrol scheduled: Saturday 19 September 2026

Member feedback & Open forum	Update on Urban Rivers and Genetics in a Bottle project: Sue provided an update on the Urban Rivers Project and the Genetics in a Bottle project. Our work remains focused on the three main Ormeau Bottle tree sites: Holcim, Boral, and the Corbould Reserve. Extensive surveys at Corbould Reserve revealed a larger population of juvenile Ormeau Bottle trees than previously known, as well as 26 Black Plum trees. This is a significant discovery, as there are only about 200 known Black Plum trees in total, and this group includes the largest specimen on record. This population, along with the Macadamia trees, will undergo genetic testing. The report was originally expected at the end of June. However, it was delayed after the Queensland Herbarium extended its testing using leftover end-of-financial-year funds. Initial indications suggest that the Bottle trees on Holcim's land are the most genetically unique. Community Event: The Ormeau Progress Association (Peachey Community Garden) is holding an Open Day on Saturday, October 10th. I will attach the event flyer to the minutes email for anyone interested in attending.
Meeting closed	● Next meeting: Thursday, 17 December 2026 TBC ★ ACTION: Prepare and circulate a meeting report to CCC & SLSG members. (K.H) ★ ACTION: Prepare and circulate a draft agenda one week prior to the next meeting. (K.H)
